Transport-Jaan Demo Account Credentials

Generated 2026-10-22 from the seeders in `database/seeders` and the local `transport` database (26 accounts: 1 super admin, 13 vendors, 12 clients and demo users).

Development only. These are seeder placeholder passwords. If a password was changed in the app, the value here no longer works; re-run the seeder or reset it. Keep this file out of version control and do not share it outside the team.

1. Admin and client accounts

Role	Email	Password	Status	Notes
Super admin	superadmin@gmail.com	Super1122	**verified**	Full admin access
Client	client@gmail.com	Client@1122	**verified**	Main client test account; owns the demo bookings
Client	admin@demo.test	password	**verified**	Named 'Admin User' but has the client role

2. Vendor accounts

vendor@example.com uses password **12345678**. Every other vendor uses **password**.

Email	Name	Password	Status	Service line	Owns
vendor@example.com	Vendor User	12345678	**verified**	Courier, Vehicle Rental, Public Rail, Bonded Warehouse	10 land vehicles, 2 buses, 4 trains, 7 warehouse units, 5 courier shipments
verifiedvendor1@example.com	Elena Morales	password	**verified**	Vehicle Rental	9 land vehicles, 3 buses
verifiedvendor2@example.com	Jacob Singh	password	**verified**	3PL Warehousing	7 warehouse units
verifiedvendor3@example.com	Chloe Kim	password	**verified**	Domestic Air	10 air vehicles
verifiedvendor4@example.com	Nimal Perera	password	**verified**	Private Yacht/Boat	10 sea vehicles
verifiedvendor5@example.com	Dilani Fernando	password	**verified**	Private Rail	4 trains
verifiedvendor6@example.com	Kasun Wickramasinghe	password	**verified**	Specialised Warehouse	6 warehouse units
newvendor1@example.com	John Doe	password	**unverified**	3PL Warehousing (submitted)	Nothing
newvendor2@example.com	Jane Smith	password	**unverified**	Courier (submitted)	Nothing
newvendor3@example.com	Alice Johnson	password	**unverified**	Vehicle Rental (submitted)	Nothing
blockedvendor1@example.com	Amara Patel	password	**blocked**	3PL Warehousing	Nothing
blockedvendor2@example.com	Liam Nguyen	password	**blocked**	Bonded Warehouse	Nothing

Email	Name	Password	Status	Service line	Owns
rejectedvendor1@example.com	Sofia Alvarez	password	**rejected**	Vehicle Rental (rejected)	Nothing

All verified vendors also have bookings, payments and commission earnings for the listings they own.

3. Other demo accounts

Email	Name	Password	Status	Notes
provider1@demo.test	Provider 1	password	**unverified**	Client role; no listings
provider2@demo.test	Provider 2	password	**unverified**	Client role; no listings
provider3@demo.test	Provider 3	password	**unverified**	Client role; no listings
provider4@demo.test	Provider 4	password	**unverified**	Client role; no listings
provider5@demo.test	Provider 5	password	**unverified**	Client role; no listings
driver@demo.test	Driver	password	**unverified**	Client role
pilot@demo.test	Pilot	password	**unverified**	Client role
captain@demo.test	Captain	password	**unverified**	Client role

Team members. Two verified client accounts, vinuksas@gmail.com and eanushanhansana@gmail.com, were created through the app and are team members of vendor@example.com. Their passwords are not in the seeders and are not listed here.

Not in the database. `TestUsersSeeder` defines client1-5@example.com and vendor1-2@example.com (password **password**), but it is not part of `DatabaseSeeder`, so these accounts do not exist unless you run it yourself.

4. Re-seeding

Run from the project root. All commands are safe to repeat.

```
php artisan db:seed --class=VendorUsersSeeder
php artisan db:seed --class=VendorDataTallySeeder
php artisan db:seed --class=VendorBookingTallySeeder
php artisan db:seed # full seed on a fresh database
```
