Vendor Portal — Complete Listing Guide

How to list a Vehicle for rental, add a Bus for ticket booking, and register a Courier delivery vehicle

Covers three vendor modules:

1. Vehicle Rental — listing a car, van, bus, truck or other vehicle for hire
2. Ticket Booking — adding a bus (or train) to your fleet and publishing schedules
3. Courier Service — registering a delivery vehicle for courier/parcel jobs

Prepared from a live walkthrough of the vendor portal.

Contents

Getting started — signing in	3
Module 1 — Vehicle Rental	4
Module 2 — Ticket Booking (Bus / Train)	8
Module 3 — Courier Service	12
Tips, statuses & troubleshooting	15

Getting Started — Signing In

Every listing type in this guide is added from the same vendor dashboard. Start by signing in with your vendor account credentials.

1. Open the sign-in page of the portal.
2. Enter your vendor **email** and **password**.
3. Click **Sign In**. You'll land on your vendor dashboard — the top navigation bar shows tabs for each service you're approved for (e.g. *Vehicle Rental*, *Ticket Booking*, *Courier Service*, *Warehousing*).

The vendor sign-in screen.

Note: Only services your vendor account has been **approved** for by an administrator will appear in the navigation bar and be reachable. If a module tab is missing, contact support to register and get approved for that service category first.

Vehicle Rental

Use this module to list any vehicle you rent out — cars & SUVs, vans & minibuses, buses, trucks, prime movers & trailers, construction equipment, and even aircraft or sea vessels. Each new listing starts as **Pending** until an administrator reviews and approves it.

Step 1 — Open the Add Unit form

1. From the vendor dashboard, click the **Vehicle Rental** tab, then open **Units** in the left sidebar.
2. Click the blue **Add Unit** button in the top-right corner.

The Add Unit form for Vehicle Rental.

Step 2 — Choose a category

Pick the transport category first (**Land**, **Air**, or **Sea**) — the form adjusts to ask for the right fields. For Land vehicles, also choose a sub-type: Cars & SUVs, Vans & Minibuses, Buses, Trucks, Prime Movers & Trailers, or Construction Equipment.

Step 3 — Fill in vehicle details

Field	What to enter
Model / Manufacturer	e.g. Model "X5", Manufacturer "BMW".
Manufacture year / Registration year	Four-digit years, e.g. 2021.
Registration number	Vehicle plate number (or aircraft registration / IMO number for Air/Sea).

Field	What to enter
Colour	Exterior colour of the vehicle.
Body type, fuel type, transmission	Land vehicles only. Pick from the dropdowns provided.
Seats, doors, luggage capacity	Passenger and storage capacity.
Fuel tank capacity / mileage	Required for Land vehicles.
Insurance provider	Name of the insurer covering the vehicle (optional but recommended).

The screenshot shows the 'Add Unit' form in the Xsarva system. The left sidebar contains navigation links: Dashboard, Bookings, Units, Calendar, Clients, Drivers, Financial, Settings, and Profile. The top navigation bar includes 'All Bookings', 'Vehicle Rental' (selected), 'Ticket Booking', 'Courier Service', and 'Waitlist'. The user is logged in as 'Vendor User Owner'. The form fields are as follows:

- Unit Number:** 4
- LUGGAGE CAPACITY (BAGS):** 3
- FUEL TANK CAPACITY (LITERS) *:** 60
- DESCRIPTION:** A TEST SUV ADDED BY AUTOMATED PLAYWRIGHT TEST.
- FEATURES & PRICING:**
 - DAILY RENTAL PRICE (\$) *:** 50
 - DEPOSIT AMOUNT (\$) *:** 200
 - ADVANCE PAYMENT (\$) *:** 100

A filled-in Land / Cars & SUVs listing, ready to submit.

Step 4 — Pricing & extras

1. Set the **Daily rental price**, **Deposit**, and **Advance payment** amounts.
2. Toggle optional extras (GPS, Child Seat, Wi-Fi, Insurance Coverage, Add a Driver, Port Pass) on or off. When you switch one **on**, its per-day price field becomes required — fill it in.
3. Use **Extra Features** to add any custom paid add-on (e.g. "Baby Stroller") with its own price.

Step 5 — Photos & documents, then submit

1. Upload at least one photo of the vehicle (required to publish a convincing listing).
2. Attach insurance or other supporting documents if requested.
3. Click **Submit / Save**. You'll be redirected to the Units list.

The new listing appears in Vehicle Rental → Units with status "Pending".

Note: A new listing shows status **Pending** until an admin approves it — it will not be bookable by customers until then. You can edit or delete a listing from the pencil/trash icons on its card.

Ticket Booking (Bus / Train)

This module manages your scheduled bus or train fleet — the vehicles that run fixed routes with timed departures, sold as individual seat tickets.

Step 1 — Open the Add Unit form

- 1. From the vendor dashboard, click the **Ticket Booking** tab, then **Units** in the sidebar.
- 2. Click **Add Unit**.

The screenshot shows the 'Add Bus / Train' form in the Xsarva system. The form is titled 'Add Bus / Train' and is part of the 'Ticket Booking' section. It includes fields for Unit Type (Bus/Train), Name, Bus Number, Bus Type, Route Number, Capacity (seats), Operator / Display Name, Status, and Facilities. The 'Bus' unit type is selected, and the 'Active' status is chosen. The sidebar on the left shows navigation options like Dashboard, Bookings, Units, Calendar, Clients, Financial, Settings, and Profile. The top navigation bar includes tabs for All Bookings, Vehicle Rental, Ticket Booking, and Courier Service, along with a search bar and user profile.

The Add Unit form for Ticket Booking.

Step 2 — Choose Bus or Train

Select **Unit Type** at the top of the form — **Bus** or **Train**. The fields below change to match your choice.

Field	What to enter
Name	Display name, e.g. "Laksiri Express" (bus) or "Udarata Menike" (train).
Bus Number / Train Number	Fleet identifier, e.g. "NC-4521" or "TR-1042".
Bus Type / Class Type	e.g. "Luxury (A/C)" for a bus, or class tier for a train.
Route Number	Route identifier, e.g. "01", "Main Line".
Capacity (seats)	Total seats available on this unit.
Operator / Display Name	Name shown to customers — defaults to your vendor name if left blank.

Field	What to enter
Status	Active/Inactive — whether the unit is currently in service.
Facilities	Tick any that apply: Wi-Fi, A/C, and others offered by the form.

A filled-in Bus listing.

1. Click **Save** to add the unit to your fleet.

The new bus appears in the Ticket Booking → Units list.

Step 3 — Add a schedule to the unit

A bus or train with no schedule can't be booked. Open the unit's detail page and add at least one timetable entry.

1. From the Units list, click into the unit you just created to open its details page.
2. Click **Add Schedule** to open the schedule form.
3. Fill in the **departure** and **arrival** stations, the **date**, **departure/arrival times**, journey **duration**, **ticket price**, and number of **seats** available for that run.
4. Click **Save** — the schedule appears immediately in the unit's schedule table.

Unit details page, showing existing schedules and the Add Schedule action.

A filled-in schedule (Anuradhapura → Badulla).

Schedules (1)

Add Schedule

Route	Date	Time	Price	Seats	Bookings	Status	Actions
Anuradhapura Bus Station → Badulla Bus Station	2026-09-29	08:30 - 12:30	\$1500.00	40	0	Active	

Confirmation toast and the updated schedules table.

Note: You can add multiple schedules to the same bus or train — one row per date/time combination it runs. Repeat Step 3 for every trip you want to offer.

Courier Service

This module registers the delivery vehicles you use for courier and parcel jobs, separate from your rental fleet or ticketed transport.

Step 1 — Open the Add Unit form

- 1. From the vendor dashboard, click the **Courier Service** tab.
- 2. Open **Add Unit** to register a new delivery vehicle.

Step 2 — Vehicle details

Field	What to enter
Vehicle Type	e.g. Van, Motorbike, Truck — pick from the dropdown.
Brand / Model	e.g. "Toyota" / "HiAce".
Registration Number	Plate number, e.g. "WP-ABC-1234".
Base Location	The city/area this vehicle is based out of, e.g. "Colombo".
Service Areas	Comma-separated list of areas covered, e.g. "Colombo, Gampaha, Kandy".
Payload Capacity (kg)	Maximum cargo weight.
Cargo Volume (m ³) / Max Dimensions	Internal cargo space, plus length/width/height in cm.
Fuel Type / Transmission	Choose from the dropdowns.
Units Available	How many identical vehicles of this spec you have.
Status	Active/Inactive.

Step 3 — Pricing, features, photos

1. Set **Price per km**, **Base Fee**, and any **Handling Surcharge**.
2. Tick applicable features (e.g. Refrigerated, Tail Lift, GPS Tracking, Fragile-item Support).
3. Upload vehicle photos and, if applicable, insurance documents (provider name + files).
4. Add a short **Description** / special instructions if useful.
5. Click **Save**.

After saving, you're taken to the Courier Service dashboard.

Note: The Courier Service dashboard's **Units** page currently shows your incoming shipment bookings, not a list of the vehicles you've registered. Your saved vehicle is stored and used for courier operations even though there's no dedicated "my vehicles" list to view it in yet.

Tips, Statuses & Troubleshooting

Listing statuses

Field	What to enter
Pending	Newly submitted, awaiting admin review. Not visible to customers yet.
Available / Active	Approved and live — customers can book it.
Inactive	Temporarily hidden from customers; toggle back to Active when ready.

Common issues

- "This field must be true or false" error on submit:** refresh the page and re-tick the checkbox before submitting — a fixed bug previously caused this on the Port Pass option.
- Required field highlighted in red:** every field marked required must be filled before the form will submit — scroll up to find the first one.
- Extra option price field greyed out:** tick the checkbox for that option first (e.g. GPS, Wi-Fi) to unlock its price field.
- New listing not visible to customers:** check its status — it's likely still Pending admin approval.

Good practice

- Use clear, well-lit photos — listings with photos convert better than ones with placeholder images.
- Keep pricing and capacity figures realistic and up to date; customers see these before booking.
- For Ticket Booking, add schedules for your full week of operating days, not just one trip.
