Vehicle Rental - Amendment Implementation Report

Transport-Jaan | Amendments of 07 October 2026 | Prepared 2026-10-29

Overview

The Vehicle Rental amendments of 07 October 2026 are implemented for Land, Air and Sea. This report lists each change made in the system.

Source documents: Vehicle Rental Land 07 October Amend 1; Vehicle Rental Air 07 October Amend 1; Vehicle Rental Sea 07 October Amend 1; Vehicle Type (sea); Vehicle type air.

How it was checked: the frontend builds without errors. The three list pages were requested with and without dates; with a date range, 6 land, 6 air and 6 sea vehicles showed as booked, and verified flags were returned. City search returns cities with postcodes (for example, "Col" returns Colombo). A 17-year-old, a bad NIC and an expired licence are rejected; valid values pass. The sea list keeps the skipper choice after a search.

Land vehicle rental

ID number, licence number and licence expiry

Checkout asks for NIC, driving licence number and licence expiry. Licence details are required for self-drive and the expiry must be in the future. They are stored on the booking customer.

Remove age, add birthday

A Birthday field (18+, and 21+ for rentals) replaces Age. The stored age is calculated from the birthday.

Reduce photo size; view photos one by one

A new viewer shows one compact photo with previous and next arrows and a thumbnail strip.

Choosing the driver option switches back to self-drive

The list page dropped the choice when it reloaded after a search. The choice is now kept, so the details page opens with the driver selected.

Unavailable vehicles show as "currently booked"

When pickup and drop-off dates are searched, vehicles with an overlapping pending or confirmed booking stay in the list with a "Currently booked" overlay.

Verified and unverified

Every vehicle card shows a Verified or Unverified badge based on the owning vendor's status.

Remove "Get a quote"

The button is removed from the land vehicle page.

City typed, zip code auto-fills

City has a type-ahead list of Sri Lankan cities; picking one fills the postcode.

Air vehicle rental

City dropdown with zip auto-fill

The same city type-ahead and postcode auto-fill is on the air checkout.

Remove "Charter Flight"

The Charter Flight / Scheduled Flight switch is removed from the air rental page, which now shows the

aircraft search directly. Scheduled flights are under Ticket Booking.

Remove "Get a quote"

The button is removed from the air vehicle page.

New air vehicle types (13)

Private Jets, Business Aircraft, Helicopters, Charter Aircraft, Light Aircraft, Turboprop Aircraft, Seaplanes, VIP Aircraft, Air Ambulance, Tourism & Adventure, Special-Purpose Aircraft, Recreational Aircraft and Other Aircraft. They appear in the filter, the vendor add-unit form, the browse tiles, the categories and the database. Earlier values are kept so existing vehicles still work.

Photos, birthday, ID and licence

The one-by-one photo viewer, the Birthday and NIC fields, the licence number and expiry, the Verified badge and the "Currently booked" overlay are on the air pages as on land.

Sea vehicle rental

City dropdown with zip auto-fill

The same city type-ahead and postcode auto-fill is on the sea checkout.

"With skipper" switches back to "without skipper"

Same cause and fix as the driver option: the skipper choice is kept when the list reloads. Opening the sea list with the skipper option selected keeps "With Skipper" selected.

Reduce photo size; view one by one

The shared one-by-one photo viewer is used on the sea details page.

Remove age; add birthday and NIC

Birthday and NIC replace Age on the sea checkout. Licence number and expiry are also asked for self-drive.

Remove "Get a quote"

The button is removed from the sea vehicle page.

New sea vehicle types (14)

Boats, Speedboats, Yachts, Sailboats, Catamarans, Jet Skis, Houseboats, Fishing Boats, Diving / Adventure Boats, Passenger Boats, Kayaks / Canoes, Pontoons, Luxury / VIP Boats and Other Watercraft. They appear in the same places as the air types. Earlier values are kept.

Files and data changed

- **Database (3 migrations):** NIC, birthday, licence number and expiry on the land, air and sea booking customers and on users; wider air and sea vehicle-type lists with old values kept.
- **Backend:** ClientBookingController (new fields, validation, age worked out from birthday, NIC and birthday saved on the profile); ClientVehicleController (availability and verified flags, driver and skipper choice kept, new type lists); Vendor/VehicleController; LocationLookupController (city search); config/vehicle_types.php; VehicleCategorySeeder; models.
- **Frontend:** land, air and sea checkout forms and search panels; air rental page; vehicle list cards and filters; vendor add-unit form; browse-by-type tiles; shared components in Components/forms and Components/vehicle; constants/vehicleTypes.js.
