Client Dashboard – Completed Work

Comparison against the "Client Dashboard" design PDF · 3 November 2026

1. Main Client Dashboard

File: `ClientCardDashboard.jsx` · Data: `ClientDashboardController.php`

Design item	Delivered
Quick booking section	Row of five tiles: Rent Vehicle, Book Ticket, Send Courier, Book Warehouse, Freight Quote.
KPI strip	Six tiles: Total spent, Total bookings, Active bookings, Upcoming, Completed, Pending payments.
Upcoming services	Next scheduled services across vehicles, tickets, courier and warehouse, with reference, date and status.
Action required	List of bookings awaiting payment or approval, each with a Review button.
Payment overview	Paid, Pending Payments, Refunds and Outstanding, with a Make a Payment button.
Service overview	Six service cards with booking totals, status bars and quick actions.
Improved analytics	Monthly Booking Trends line chart (last six months, by service).
Quick Shortcuts	My Bookings, Upcoming Services, Payment History, Track Courier.
Better support access	Need Help panel with Live Chat and Contact Us, plus an Emergency Support button.

Backend additions

- Per-service upcoming bookings (by pickup, departure, travel or start date).
- Pending-item list for the Action Required panel.
- Paid, pending and refunded totals.
- Six-month booking counts per service group.

2. Courier Dashboard

Files: `HeroEnhanced.jsx` · `ClientCourierController.php`

- Added the **Out for Delivery** status card (summary tile, filter option and status label).
- Shipment status overview, filters, export, Upcoming Deliveries, Quick Actions, Saved Senders / Recipients and Domestic / International tabs are in place.

3. Warehouse Dashboard

Files: `warehouseBooking/Hero.jsx` · `WarehouseBookingController.php`

Design item	Delivered
Warehouse occupancy overview	Donut chart with occupied, reserved and available sq ft, occupancy percentage and total capacity.
Upcoming operations	Move-in and move-out schedule for the next 30 days.
Scheduled arrivals / dispatches	Counts derived from the move-in and move-out schedule.
Storage type management	Booking counts per storage type.
Alerts & notifications	Payment due, booking expiring and missing-document alerts.
My booked warehouses	Booked warehouse cards with manage actions.
Billing and payment	Outstanding balance, paid this year and next invoice date.
Documents & agreements	Documents attached to bookings.
Recent activity	Recent bookings, payments and status changes.
Trends	Booking trends and status distribution charts.

4. Vehicle Rental and Ticket Booking Dashboards

Files: `client/Hero.jsx` · `ticketBooking/Hero.jsx`

- **Vehicle rental:** Upcoming Reservations, Quick Actions, Attention Required, booking trends, rental distribution, spending overview, Land / Air / Sea and status filters, pagination.
- **Ticket booking:** Quick Booking, Next Trip, Travel Alerts, Travel Spending, Booking Activity, Payment Summary, Quick Actions, filters, export and refunds.

5. Verification

- Frontend production build (`vite build`) completes without errors.
- PHP syntax checks pass on all changed controllers.
